

High-productivity, high-precision conformal coating systems

MYSmart[™] series MYC50[™] in-line coating

Introducing the MYC50 platform **High-performance conformal coating systems**

As electronics continually become embedded into an endless variety of products, the need for high-precision conformal coating is greater than ever before. Automate complex coating processes, monitor process parameters and switch spray patterns without interruption. The MYC50 gives you powerful, softwaredriven process flows that ensure years of productivity for even the most complex printed circuit boards.

- Fast and stable operation.
- 2 Spray patterns can be changed on the fly, significantly improving process efficiency.
- 3 Flexible multi-axis control enables precise coating of complex PCBs.
- Powerful process controls result in precise coating that consistently meet strict quality guidelines.
- 5 Barcode reader enables automatic program loading and traceability.

The MYSmart series MYC50 in-line conformal coating platform combines high-accuracy edge definition with advanced feedback systems. A wide range of process parameters can be monitored enabling high quality output. Options such as fan width control, flow monitoring, heated fluid systems and barcode readers are a few examples of process control enhancements that are possible. Wherever ruggedized elecronics are required, the MYC50 helps to prevent material waste while ensuring highly controlled coating film thickness, coating area and process speed.

Fast and stable operation

Automated spray pattern changeovers

Flexible multi-axis control for complex processes

Powerful process controls enhance quality

Barcode-defined program selection

Applications

- Consumer electronics
- Industrial electronics
- Household appliances
- Automotive electronic control panels
- Military electronics
- Computer control panels
- Agricultural equipment control panels
- Battery protection boards
- Led lighting
- Outdoor led displays
- Converter circuit boards
- Security control panels
- Motor control boards
- Power management devices

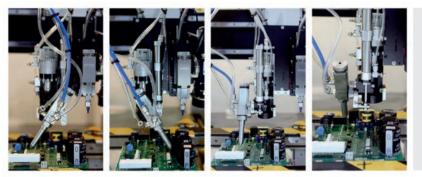

Highly configurable for precise conformal coating results

The MYC50's high-precision platform, multi-angle rotation configuration and flexible software operation ensures perfect selective conformal coating output.

High speed, high precision motion platform

- Robust design of frame structure and axis
- High precision ball screw and AC servo motor
- High speed operation with extreme precision

Angle and rotate coating capabilities

- Four-direction tilting
- Software controlled
- Modular design for easy installation and removal
- Suitable for spray and jet valves

Intuitive software design

- Offline programming
- Easy software to operate and learn
- Rich functionality to meet complex processes
- A variety of program input methods including camera teaching

Smart coating made simple

The MYC50 is built upon years of coating experience, condensing that knowledge into a robust, easy to use system. The result is a highly capable platform that's simple to program and operate, yet powerful enough to add increasing value to your in-line operations as volume, complexity and automation demands grow. Giving you more ways than ever before to handle tomorrow's production challenges.

Valve configurations for every application

Three mode valve V-5000

V-5000 is suitable for middle to low viscosity fluids. The three modes are line, swirl and spray. The V-5000 valve has high edge definition and good balance between effciency and effect.

Needle jet V-420A

Film valve V-5400

application.

The V-420A needle jet is suitable for low viscosity materials and mainly used in selective coating applications. Maximum dispensing speed is 100 dots per second. For tall component coating areas and very small tolerances of noncoating requirements, the best choice is V-420A configured with spray or film valve.

The V-5400 film coating valve is suitable

materials. A special nozzle structure

enables the material to be applied in a

non-atomized manner, with a utilization

rate of up to 99 percent. Optional sizes

of nozzles help achieve the best results

of film width and thickness for your

Low pressure spray valve V-5800

The V-5800 low pressure spray valve

is for medium and low viscosity fluids.

It can achieve a small width and a thin

selective spraying and thin deposition

requirements. help achieve the best

results of film width and thickness for

film thickness, ideal choice for precision

Gel valve V-420A

your application.

The V-420A Gel valve is for conformal coating materials formulated at higher viscosities that are used as a barrier to prevent the lower viscosity coating material from flowing to undesired locations. The V-420A Gel valve is normally used in a 3 valve configuration with the V-410 Needle jet and either the film valve or one of the spray valves.

FEATURES AND ADVANTAGES Controlled film thickness at high speed

- Viscosity range: 500-10.000 CPS
- Optional 360 degree rotation structure
- Easy maintenance

> FEATURES AND ADVANTAGES

- Good sealing effect, especially for low viscosity materials
- Cost effective
- Simple structure and easy maintenance
- Flexible needle sizes and changeable needles
- Adjustable flow rate by parameter settings
- High precision dispensing accuracy

> FEATURES AND ADVANTAGES

- Non-atomizing mode reduces emissions
- efficiency
- High material utilization, reduced waste and low cost
- Standard 90 degree rotation of film direction
- No masking required

FEATURES AND ADVANTAGES

- Non-atomizing mode reduces emissions
- Adjustable film width and high transfer efficiency
- High material utilization, reduced waste, and low cost
- Optional 90 degree rotation of film direction
- No masking required

> FEATURES AND ADVANTAGES

- Controlled deposition of higher viscosity coating materials
- · Positive cutoff for clean material cut-off
- · Adjustable stroke to optimize material flow
- Easy maintenance

Specifications MYC50 in-line

MOTION SYSTEM			
X-/Y-AXIS	Z-AXIS		
Speed: max 800 mm/s	Speed: max 300 mm/s		
Acceleration: max (0.8g peak with s-curves)	Acceleration: max (0.3 g peak with s-curves)		
Repeatability: ±25μm, 3σ	Repeatability: ±25μm, 3σ		
Drive mode: servo motor, ball screw	Drive mode: servo motor, ball screw		
DAVIC			
D-AXIS			
Rotation angle: ±90°	Rotation angle: ±30°		
Repeatability: ±0.1°	Repeatability: ±0.1°		
Drive mode: cylinder	Valve rotation axis		
WORK AREA			
ONE WORK STATION	TWO WORK STATIONS		
Single valve max: 650 x 450 mm	Single valve max: 450 x 450 mm		
Dual valve max: 560x450mm	Dual valve max: 450 x 450 mm		
Dual valve with tilting module max: 560x380mm	Dual valve with tilting module max: 450x380mm		
3 valves max: 530x380mm	3 valves max: 450 x 380 mm		
	Max clearance above and below PCB: 100 mm		
BOARD HANDLING	FACILITY REQUIREMENTS		
Drive mode: stepper motor, stainless steel chain	Power: 220 V, 2.5 kW, 16 A, 60 Hz		
Payload capacity: 5kg			
Min board/carrier width: 40 mm	System footprint: 1,290x1,364x1,638±50mm (WxDxH)		
Max board/carrier width: 500 mm	Machine weight: 900kg		
Max board/carrier length: 650 mm (1 station)	Standards compliance: CE, UL (optional)		
450 mm (2 stations)	Exhaust volume: diameter 200mm, volume ≥13m³/min		
Min board edge: 3mm			
Width adjustment drive mode: stepper motor			
Communication signal: SMEMA			
CONTROL SYSTEM	FLUID DELIVERY METHODS		
Computer: IPC, LCD monitor, keyboard	V-5000 three-mode spray valve		
Operating system: Windows 10	V-420A jet valve		
Control software: Axxon/Mycronic software	V-5400 film coater		
	V-5800 low pressure spray valve		
	V-420A gel valve		
STANDARD FEATURES	OPTIONAL FEATURES		
Industrial computer and software and monitor	Conveyor module/bottom return conveyor		
X-/Y-/Z-axis and motion platform	Cleaning platform		
Conveyor auto-width adjustment	Pressure tank supply module		
Ultraviolet and white light	Low liquid alarm module		
Safety interlock	Fluid heating module		
Audible alarm	Pump supply module		
Exhaust port	Laser height detection module		
Fluid supplying pipe	Laser fan width adjusting control (V-5400)		
Material changeover module	Nozzle calibration module		
CCD camera	Exhaust detection module		
Offline programming	Four direction tilting module (for V-420A and V-5000 series valve)		
Fiducial alignment software	Electric tilt and rotate module (for V-420A and V-5000 series valve)		
Machine spare part kit	2D barcode reader module		
Valves spare part kit	Flow monitoring		
	Closed loop flow controls		
	Automatic coating inspection		
	THT component detection		

for low viscosity fluids and solvent-based

• Adjustable film width and high transfer
