

Simple and smart tabletop robots

MYSmart[™] series MYT10[™]/MYT50[™] tabletop robots

Introducing the MYT50

High-performance tabletop robots

The MYSmart MYT50 is designed to tackle complex electronics assemblies. These tabletop robots are highly capable and scalable to meet current and future requirements. From advanced prototyping to batch production, the MYT50 is designed with flexibility and configurability in mind.

FULL RANGE DISPENSER ON A TABLETOP

The MYT50 comes standard with advanced capabilities, including automated calibration and visual inspection, barcode and fiducial scanning, and z-axis laser height compensation, bringing easy-to-use in-line functionality into a space-saving tabletop format.

Common application

- Fingerprint module dispensing
- FPC dispensing
- VCM dispensing
- Underfill
- Encapsulation and coating
- Edge bonding and sealing
- Corner bonding
- Solder paste dispensing

Standard setup

- Three-axis movement
- CCD for fiducials and programming
- Non-contact laser height sensor
- Intelligent valve control
- CCD barcode reader for program loading
- Nozzle cleaning
- IPC

Configurable options

- Low liquid level alarm
- Bent needle calibration

Nozzle cleaning

- Integrated into the system
- · Good nozzle cleaning effect
- Suitable for MYT50 machine with jet valve

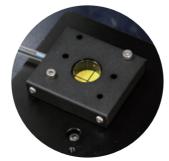

Laser height detection

- Auto detection of product height
- Automatic collision avoidance
- Compatible with all Mycronic valves

Low fluid level detection module (optional)

- · Alert operator when new materials are needed
- · Alarm when liquid level too low
- · Prevents excessive air into adhesive

Automatic needle calibration module (optional)

- For use on valves with needles
- Simplifies setup and reduces time
- Ensures process repeatability
- Ideal for semi-automatic assembly processes

For small-batch manufacturers, the MYSmart series provides a selection of robust tabletop dispensing robots with varying levels of capabilities.

INTRODUCING THE MYT10

The semi-automated MYT10 series is well suited for cost-effcient handling of standard electronic and industrial packages, as well as testing, and heat-conductive dispensing. Automatic needle calibration and intelligent valve control help to ensure minimal setup and stoppage times for the most complex program routines.

Common application

- Adhesive dispensing
- Testing
- Industrial dispensing
- Potting
- Gasketing

Standard setup

- Three-axis movement
- Intelligent valve control
- Handheld pendant controller
- Bent needle calibration

Specifications MYT50 and MYT10 series

| | MYT50S | MYT50M | MYT50L | MYT50 MD | MYT50 LD |
|-------------------------|---|----------------------|---------------|---|-----------------------|
| Dimension (DxWxH) | 540x640x630mm | 640x740x630mm | 740x840x630mm | 706x841x623mm | 806x941x623mm |
| Working area (XxYxZ) | 300x300x100mm | 400x400x100mm | 500x500x100mm | 400x400x 400x100mm | 500x500x 500x100mm |

Tabletop robot applications

APPLICATIONS IN CONSUMER ELECTRONICS INDUSTRY

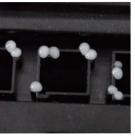

- 1. Pin encapsulation
- 2. Hearing aid dispensing
- 3. Speaker plug dispensing
- 4. Camera module dispensing
- **5.** Fingerprint recognition module

APPLICATIONS IN AUTOMOTIVE ELECTRONICS

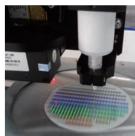

- 1. Cylinder cover sealing
- 2. Connector dispensing
- **3.** Grease dispensing
- **4.** Engine tank dispensing
- **5.** Potting for automotive sensors
- **6.** Fire coil dispensing

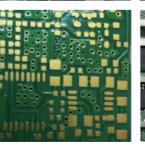

APPLICATIONS IN OTHER INDUSTRIES

- 1. Test tube dispensing
- 2. Underfill dispensing
- **3.** Semiconductor bonding
- 4. LED dispensing
- **5.** Solder paste dispensing
- **6.** Chip corner bonding
- **7.** SMA
