

We are looking for a dedicated individual to join our team as soon as possible as a
Field Service Engineer (m/f/d)

Your role

As part of our technical support team, you'll play a crucial role in ensuring our customers' success. If you thrive on solving technical challenges and enjoy engaging with clients, this position is tailor-made for you.

Your tasks

- Installation and commissioning of our complex high precision lithography and development systems at our customers' sites
- Regular maintenance work
- Supporting customers with technical and application-related issues (on-site as per necessity)
- Training our customers in utilizing our machines to their full potential
- Performing machine demonstrations as needed

Your profile

- Bachelor, Master or PhD degree in Optics & Photonics, Electrical Engineering, Microsystems Engineering, Physics, or a comparable qualification
- Willingness to travel 50% nationally and internationally
- Understanding of optical systems and high-precision motion control
- Strong communication skills ideally combined with experience in customer interaction
- Good knowledge of English
- International driving licence is a plus

Your application

Please send us your detailed application with curriculum vitae, references, certificates, and salary requirements by e-mail to jobs.vanguard@mycronic.com.
