

We are looking for a dedicated individual to join our team as soon as possible as a
Reliability Testing Operator or Technician (m/f/d)

Your role

In this position, you will be responsible for building, fabrication, characterization, and monitoring of assemblies under different environmental conditions as well as the quality control of the corresponding processes.

Your tasks

- Building and testing of standard assemblies in the field of integrated optics/photonics packaging
- Execution of standard test series including measurement, evaluation and documentation
- Support in failure mode analysis and reliability engineering
- Quality assurance of materials and processes

Your profile

- Basic technical knowledge and willingness to explore new technical areas and practical tasks
- Training as a laboratory technician is an advantage, including microtechnologist, physical-technical assistant, microsystems technician, chemical-technical assistant or a comparable qualification
- Ability to work independently in an international team
- Good knowledge of English and/or German is an advantage

Your application

Please send us your detailed application with curriculum vitae, references, certificates, and salary requirements by e-mail to jobs.vanguard@mycronic.com.
