MRSI Systems (a part of Mycronic Group) is the leading manufacturer of fully automated, high-speed, high-precision, and flexible eutectic and epoxy die bonding systems. We leverage over 40 years of industry expertise in high-accuracy die bonders, active aligners, and fluid dispensers to deliver unparalleled precision and reliability for R&D, NPI, and high-volume manufacturing of photonic devices such as lasers, detectors, modulators, WDM/EML TO-Cans, Optical transceivers, LiDAR, VR/AR, sensors, silicon photonics, co-packaging optics, and optical imaging products. We provide the most flexible assembly solutions for all packaging levels, including chip-on-wafer (CoW), chip-on-carrier (CoC), PCB, and gold-box packaging. Our commitment to excellence ensures we meet our customers' needs with meticulous attention to detail and 24/7 field support. For more information, visit <https://www.mycronic.com/product-areas/die-bonding/>.

Mycronic is a Swedish high-tech company engaged in the development, manufacture and marketing of production equipment with high precision and flexibility requirements for the electronics industry. Mycronic's headquarters are located in Täby, north of Stockholm and the Group has subsidiaries in China, France, Germany, Japan, Mexico, the Netherlands, Singapore, South Korea, United Kingdom, the United States and Vietnam. Mycronic is listed on Nasdaq Stockholm. www.mycronic.com

MRSI-H1 1 MICRON DIE BONDER

Patented turret for "on-the-fly" tool change

MRSI Systems has been serving optoelectronic and microelectronic customers for the past 40+ years and understands their requirement to scale efficiently in today’s fast-paced marketplace.

Applications are found across a wide range of market segments, such as AI Clusters, Medical, Aerospace, Wireless, Automotive, Sensors, and more.

MRSI’s die bonding solutions help our customers to enable just-in-time supply and fast-pace innovations of critical components for high-growth market segments. The MRSI-HVM and MRSI-H provide industry-leading high-speed for high-volume manufacturing.

These die bonding solutions are built with the same hardware and software platforms configured to minimize process deviations, reduce NPI cost, and increase ROI for customers with MRSI’s long proven product reliability and global customer support.

MRSI-H1 Applications

- MRSI-H1**
- This standard system is widely used in advanced photonics such as lasers, receivers, transceivers, lighting, and sensors, etc.
 - Carries key technological building blocks from our field-proven, flexible and high-speed MRSI-HVM platform
 - Heated head option designed for the higher density eutectic packaging
 - Patented “On-the-fly” auto tool changer has twelve vacuum tips/collets integrated on the bonding head for zero time tool change

- Value to our Customers**
- Industry leading throughput, superior flexibility, and ultra-high-accuracy in high-volume, high-mix manufacturing
 - Easy to use icon-based interface running on a Windows™ platform for ease of programming, and low-cost machine maintenance
 - Industry leading local technical support teams and application expertise
 - 40+ years of experiences in the industry with reliable 24/7 field operations

MRSI-H1 1 Micron Die Bonder

H1		
CONFIGURATION	STANDARD	HEATED HEAD
APPLICATIONS		
CoC/CoS/CoB	●	●
CoC Silicon Photonics	●	●
3D Die Stacking	●	●
Pillar-to-Pillar Bonding	●	●
AOC/PCB	●	
Gold Box	●	
Complex TO, E.g. EML/WDM		
PROCESSES		
Multi-die	●	●
Multi-process	●	●
Eutectic	●	●
Epoxy Stamping	●	●
Epoxy Dispensing	●	
UV Curing	●	
Localized Heating		●
Flip-chip Bonding	●	●
Co-planarity Bonding	●	
FEATURES AND OPTIONS		
Composite Base	●	●
Single Gantry/Head	●	●
Heated Head		●
Ultrafast Eutectic Station	●	●
“On-the-fly” Patented Tool Change	●	
Remote Patented Auto Tool Change		●
Inline Conveyor	●	●
Input GP/WP & Wafer	●	●
Output Stage	●	●
Material Transfer Head	●	●
